

## A closer look at **Premium Pre Starts**

**Premium Pre Starts** gives you the tools to keep track of pre starts across your fleet, manage service intervals and handle any rectification actions that need taking care of.

### Features and benefits

#### Reporting and alerts

Get a daily summary of pre start activity delivered straight to your inbox, detailing pre starts completed and each machine's operational status. You'll be alerted instantly if there are any critical issues that need attention. That way, you can make sure pre starts have been completed, and can easily prioritise rectification orders for minimal downtime.

#### Action management, including work orders

Found an issue when completing a pre start? Create a work order, set a deadline and add details like the cost of the work and time frames involved. Then you can assign it to the relevant person in Ideagen Plant Assessor for actioning.

#### Pre start dashboard

With the pre start dashboard, you'll be able to see the status of completed Premium Pre Starts across your entire fleet, and which shift they were completed in. You'll also get a top level view of any outstanding issues to be resolved, including work orders assigned and their status.

#### Bespoke service intervals

When completing pre starts, depending on the machine type, you can enter odometer or hour meter information, and schedule service intervals. This is great for setting intervals to match manufacturers recommendations, or your own requirements, so you'll never miss a service.

## How to start using Premium Pre Starts

To enable Premium Pre Starts, simply select the relevant machines from your Plant Assessor account, and hit 'Manage Premium Pre Starts' from the left hand menu.

### Enabling Premium Pre Starts

1. Tick/select machines you want to enable Premium Pre Starts on from the Machines screen.
2. Hit 'Manage Premium Pre Starts' option under Operations on the left hand side menu (01).
3. Toggle the slider on the machines you want to enable Premium Pre Starts on, or select 'Enable All' if you want all selected machines enabled (02). Click Save then Close.

### Configure Premium Pre Start Notifications

1. Click on your account icon in the top right and select 'MyAccount'.
2. Select the Notifications tab (03). Under the heading 'Premium Pre Starts' tick the Daily Pre Start Report (04).
3. Add 'Owners' to receive daily reports. Click Save then close.

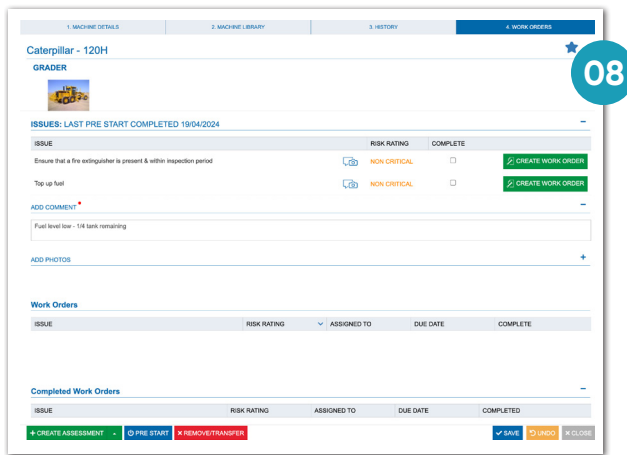

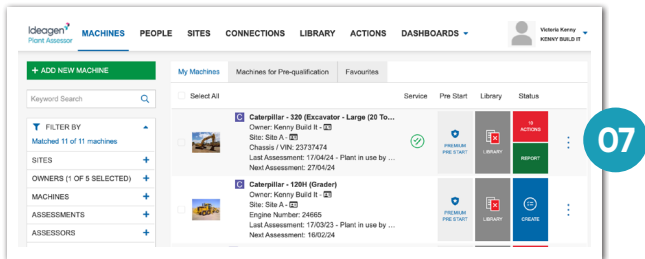

### Accessing reports

1. From the Machines screen, tick/select the machines you want to report on.
2. Click on the 'Pre Start Report' option under Operations on the left hand side menu (05).
3. Switch between Free and Premium Pre Start reports by selecting the relevant tab (06).

## Work Order management

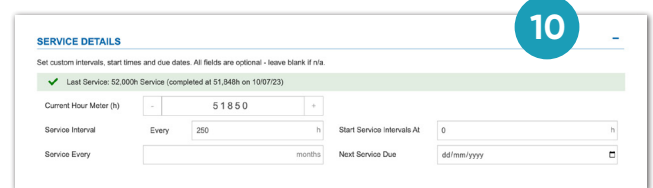

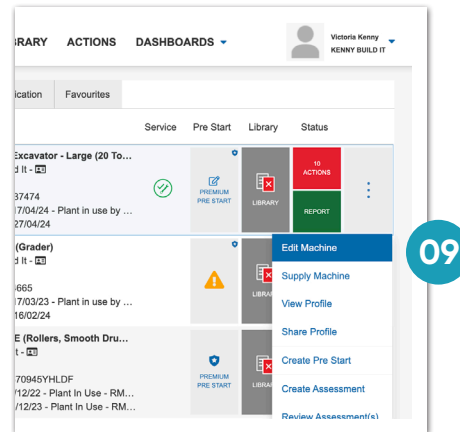

To create work orders from any identified pre start issues:

1. In the Machines tab, select the 3 dots on your machine (far right, **07**).
2. Select 'Work Orders'. In here you can view issues, create Work Orders, and mark Orders as complete (**08**).

## Setting bespoke service intervals

1. From the Machines screen, select the 'Edit Machine' option (**09**) on the relevant machine.
2. On the 'Machine Details' tab, expand the 'Service Details' drop down.
3. You can Set custom intervals, start times and due dates (**10**).

## Have you downloaded our FREE app yet?

Get your operators to use the **free Pre Start Plus app**. All pre start data syncs automatically to Ideagen Plant Assessor, including any issues, notes and photos - so you can ensure daily pre starts are complete, and can resolve any issues straight away.
